B) RESIDENTIAL	\$ DOUBLE

**NOTES:**

1. All commercial loads must be accompanied by SANTA CRUZ COUNTY Uniform Solid Waste Manifest Form, which identifies the solid customer account number, waste load contents, source and point of origin or physical address.
2. In the event, that a non-standard vehicle (i.e. panel wagon, dump truck, full or small size pickup with side rails or single axle trailer with or with out side boards) is used to transport solid waste, the Fee Attendant is required to weigh in and weight out the vehicle. If in the opinion of the Fee Shed Attendant the vehicle and/or trailer used to transport solid waste or other material substantially exceeds 250 lbs. or 1.67 cubic yards for a small pick up or 500 lbs. or 2.63 cubic yards for a larger pickup, then the vehicle will be weighed in and weigh out and charged at the per ton rate.
3. The compacted and uncompacted values will be used only if the scale breaks down or if the software crashes, which will be noted on all hand written invoices.
4. Construction and Demolition (C&D) debris is defined as any solid waste that is generated from construction or demolition activities (ARS 49.701.5 & 7, respectively). Examples of C&D material include, but are not limited to rock, dirt, sand, concrete, asphalt, metal, bricks, sheet rock, asphalt and wood shingles, processed and natural wood wastes, and automobile body parts. All residential and commercial C&D material, will be weighed in and weighed out and billed at the per ton charge.
5. Unsecured and Uncovered Loads will be charged double the disposal fee, because of the high probability that the solid waste will be blown or fall out of the vehicle and cause litter and Road Hazards of public right of ways.
  - An Unsecured Load are defined as loads that are not restrained, tied down or secured with tarps, nets or ropes.
  - An Uncovered Load is defined as loads that are not covered or restrained by a tarp, nets or ropes.
6. DETERMINATION OF CHARGES - The Fee Attendant (e.g. cashier) shall determine whether a particular load is commercial or non-commercial based on the above definitions. The user shall, at the time of use, abide by that decision or vacate the property.

If a user believes s/he has been wrongly charged the commercial rate, s/he may submit an affidavit to the Manager, stating that the load was non-commercial and did not fall under the definition used by the Fee Shed Attendant to determine the user fee and provide proof thereof. Proof can be photographs of the load, witness's that were either other users of the Facilities or accompanied the person to the Facilities and witness the unloading of the solid waste at the Facilities.

Depending on the Manager's determination of the load's status, the difference between the commercial and the non-commercial fee may be refunded to the user.

7. The SCC, Solid Waste Facilities are all Active Waste Screening Facilities. As such we reserve the right to inspect any load or portion of load arriving at any of the facilities. We will reject all un-accepted waste and any other wastes determined un-acceptable by our management. Your participation in this program is not optional!
